### DR. HIRSHBERG PRESCRIBES

Intelligent Observation of Hygienic Rules Decreases Illness.

By DR. L. K. HIRSHBERG.

Sharper than a serpent's tooth in its venomous effects upon your life's blood are your own ivories, if not thoroughly cleaned with a proper paste, powder, fluid, soap, or other "dentifrice."

The combined objects to be attained by the best substances are deodorant, anti-acid, anti-decomposing, anti-septic, and germicidal. In this way food particles, fermenting meat fibers, fermentations, microbes, and debris generally left between the teeth, on the gums and tonsils after a "bite to eat" can be swept out as well as checked in their malodorous and pernicious activities.

It is highly advisable that the chemicals and minerals selected to secure the teeth from all such depredations shall be diligently prepared by a particular view to the manufacture of a smooth, homogeneous dentifrice free from any danger to the enamel of the teeth. Plainly, the menace to the health and life of the teeth is the chance of injury to their surface and the invasion of the delicate "ivory" by bacteria, which are eternally present everywhere.

It is such an entrance which leads to decay and eventually to the aches and agonies associated with "poor" teeth.

The use of some substance after each meal, and night and morning, either with a tooth brush or water, under pressure enough to force its way between the teeth and into the gum margins, will prevent much dental trouble.

Chalk possesses neither germicide nor anti-decay properties. Yet it is an all too popular material in tooth washes and pastes. As a matter of fact, it damages the enamel if not smoothly and finely divided. It may actually erode or wear away the teeth.

Indeed, a tooth paste or powder with gritty particles in it is a menace against sound teeth, for it will sooner or later scratch the beautifully polished surface of the teeth and thus burglarize them of their sturdiness and strength.

Talk lycopodium, Fuller's earth and other sand-like grit, common ingredients in some pastes and powders, are often capable of serious damage. It is well-nigh impossible, according to the laboratory departments of the London Lancet, always to maintain a smooth paste or powder, free from gritty particles.

This radical medical department also maintains that it is not always impossible, much less probable, that by the use of the toothbrush alone decayed bits of food can be kept from the gums and teeth.

Chewing coconut pulp, gum, but

especially apples acts as an effective scourer of the teeth as well as expensive "dentifrices." This practice, followed by the liberal use of a moist brush, the bristles of which will not be too stiff or too soft, has proved especially helpful and effective in the new English army.

Finally, it appeals especially because the method is cheap and commonly at hand.

## CLUBS TO HELP GET WORK FOR WOMEN

Will Form Committee Here to Co-operate With Department of Labor.

A federated co-operative committee, formed of representatives of Washington women's clubs, will be organized here soon to aid the Department of Labor in obtaining positions for women out of employment.

The decision to form the committee was tentatively made yesterday afternoon, following an address before representatives of women's clubs by Commissioner of Labor Caminetti, in the Public Library. Women who were present yesterday will put the matter before their clubs and receive the organizations' endorsement. A meeting will be held in the Public Library, March 23, at which the committee will be appointed and its work started.

Commissioner Caminetti yesterday outlined the work of such a committee, and told how the plan was now in operation in other cities of the United States, having the endorsement of twenty-eight national women's clubs, representing a membership of 7,000,000 women.

**Aid To Home Gardening.**  
In all cases, the committee is a clearing house between the women applicants for positions and the Government departments.

With the formation of the committee here, the "back yard gardening plan" to combat the high cost of living will receive a decided boost in the manner outlined as follows by one of the women present yesterday.

Many women in Washington are unable to leave home for outside work, yet are in need of remunerative employment. Such cases, reported to the federated co-operative committee, will in turn be reported to the Department of Labor. Should the committee's report be favorable, the labor department will be asked to place the women in question in positions where the cases will be turned over to the Department of Agriculture. Instructions as to what the women should grow, and how to cultivate the back yard, then will be forwarded.

**To Standardize Home Labor.**  
The formation of the committee is particularly in keeping with the recent announcement by the Department of Labor that women will be given equal chance to compete with men for positions in munition factories. Women and girls found out of employment will be reported to the Department of Labor. The department then will give them information concerning the requisites of women employees in munition factories.

Perhaps the biggest aim of the committee will be to standardize home labor. Other branches of employment have their standard grades of pay, working hours, and requirements. Home labor, however, economically one of the largest branches of service in the country and employing as large a force as any, has no standard.

### SEEK MEN TO KNIT

Those Who Can't Are Urged to Purchase Wool.

"Will you knit?" said the woman. "No," said the man.

"Well then, will you contribute to the cause by buying some of the wool, so that some woman may knit?" asked the woman.

And the man walked in and contributed a quarter, bought the wool and left it to be knitted into a jacket for the seamen of the United States Navy.

The comfort committee of the woman's section of the Navy League, with headquarters at 607 Fourteenth street, through its chairman, Mrs. James Carroll Fraser, yesterday extended an invitation to men interested to come and do their bit by either contributing to the fund for the purchase of wool with which to make the jackets, wristlets and mufflers, or by sitting down, picking up a needle and wool and joining the busy assemblage of females in their silent knitting, knitting.

Although history has furnished some illustrious examples to the contrary, it is a sad fact that, up to the present, not one man of Washington has screwed up the courage to pick up a needle and knit. One man yesterday ventured into the sanctuary, and was compelled to contribute to the extent of a quarter before he was able to get away, but so far the gentler sex has done all the knitting which is to protect the jacksies from cold and wind.

In the window, where completed articles are on display, a printed card invites the passer-by to assist either by knitting a garment or buying the wool. This invitation is presumably to women, but while no provision has been made for the man who can knit, his handiwork will be accepted if it measures up to the specifications of the Navy Department.

## Gas, Heartburn Indigestion or a Sick Stomach

"Pape's Diapepsin" relieves stomach distress in five minutes.

Time it! Pape's Diapepsin will sweeten a sour, gas or out-of-order stomach within five minutes.

If your meals don't sit comfortably, or what you eat lies like a lump of lead in your stomach, or if you have heart-burn, that is usually a sign of acidity of the stomach.

Get from your pharmacist a fifty-cent case of Pape's Diapepsin and take as many as you need. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach, nausea, debilitating headaches or dizziness. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with nauseous odors.

Pape's Diapepsin helps to neutralize the excessive acid in the stomach, which is causing the food fermentation and preventing proper digestion. Relief in five minutes is waiting for you at any drug store.

These large fifty-cent cases contain enough "Pape's Diapepsin" to usually keep the entire family free from stomach acidity and its symptoms of indigestion, dyspepsia, sourness, gas, heartburn and headache, for many months. It belongs in your home.—Adv.

## A CLEAR COMPLEXION

Ruddy Cheeks—Sparkling Eyes—Most Women Can Have

Says Dr. Edwards, a Well-Known Ohio Physician

Dr. F. M. Edwards for 17 years treated scores of women for liver and bowel ailments. During these years he gave to his patients a prescription made of a few well-known vegetable ingredients mixed with olive oil, naming them Dr. Edwards' Olive Tablets, you will know them by their olive color.

These tablets are wonder-workers on the liver and bowels, which cause a normal action, carrying off the waste and poisonous matter in one's system.

If you have a pale face, hollow cheeks, dull eyes, pimples, coated tongue, headache, a listless, no-good feeling, all out of sorts, inactive bowels, you take one of Dr. Edwards' Olive Tablets nightly for a time and note the pleasing results.

Thousands of women as well as men take Dr. Edwards' Olive Tablets—the successful substitute for calomel—now and then just to keep in the pink of condition. 10c and 25c per box.

## TO URGE SPECIAL EFFORT FOR FUND

Holy Name Society Will Consider Means to Spur Collection of \$50,000.

Members of the Holy Name Society of St. Paul's Catholic Church will be asked tomorrow night in the parish hall, Fifteenth and V streets northwest, to exert efforts in the coming week to increase the Mgr. Mackin Golden Jubilee Fund.

Officers of the Society will outline a plan which is expected to result in materially increasing the fund, the campaign for which will close March 22.

During the last month special solicitors of the parish have been campaigning to acquire "\$50,000 in fifty days." The aim is to be used to complete the church building and install two side altars and a pipe organ. It is the hope of the parish that the full amount will be raised in the time set, but if this is done more than \$10,000 a day must be subscribed in the remaining twelve days of the campaign.

The amount raised up to noon today was slightly below \$32,000. A definite report on finances will be made to the Holy Name Society tomorrow night.

Tomorrow will be Holy Name Sunday in St. Paul's Church. Members of the society will receive communion at the 7 o'clock mass, and at 7:30 o'clock in the evening special devotions will be held. Following the services the members will meet in the church hall.

## LOAN BANKS TO PAY SMALL DIVIDENDS

Farmers' Interests To Be Considered First in Operating New Credit System.

The dividend policy of the twelve farm loan banks will be "parliamentary." The farm loan board entertains the opinion that the farmer would rather have earnings put back into the business than paid out in dividends.

Students of the farm loan act have figured that stock in the hands of the public might receive dividends at rates variously estimated at from 15 to 45 per cent a year.

This is because about 90 per cent of the capital of the twelve banks was subscribed by the Government. The Government will take no dividends. This would leave the entire dividend earnings for the small share of the stock in public hands.

These figures dwindle to ordinary proportions, when it is considered that the percentage of dividends is discretionary. The farm loan board is opposed to granting large dividends. It is willing to pay a fair return on stockholders' money, but no more. Within the discretion invested in them by law, managers of the rural
